Room 1061  
Rockville, MD 20852

Dear Secretary Leavitt and Commissioner von Eschenbach:

We the undersigned [collectively, representatives for the Coalition for Mercury-free Drugs] hereby petition the United States Department of Health and Human Services (HHS) and the HHS' Food and Drug Administration (FDA), pursuant to the United States Constitution, the Public Health and Welfare (codified in Title 42 of the United States Code [**42 U.S.C.**]) at, but not limited to, **42 U.S.C. Section 262(a)(2)(A)**, **42 U.S.C. Section 262(d)(1)**, **42 U.S.C. 262(j)** and **42 U.S.C. Section 300aa-10 et seq.** [added by the National Childhood Vaccine Injury Act {1988 & 1998 Supp}], the Federal Food, Drug, and Cosmetic Act (FDC Act, codified in Chapter 9 of Title 21 of the United States Code [**21 U.S.C. Chapter 9**]) at, but not limited to, **21 U.S.C. Section 351(a)(2)(B)** and **21 U.S.C. Section 355(e)(3)**, and Title 21 of the Code of Federal Regulations (**21 C.F.R.**) including, but not limited to, **21 C.F.R. Section 10.30**, requesting the Secretary of Health and Human Services or the Commissioner of Food and Drugs, as appropriate, to:

1. IMMEDIATELY issue an order barring the administering of any disease-preventive Thimerosal-containing vaccine, or other such mercury-containing pharmaceutical product, that contains more than 0.05-micrograms-per-dose levels of Thimerosal to pregnant women and children under the age of 60 months, on the grounds that higher levels are **now** (as of 1 May 2007) a **proven** health hazard to **susceptible** fetuses, newborns and young children,
2. Suspend the approval or licensing of any FDA-regulated product that contains Thimerosal or any other mercury-based compounds as a preservative, or adjuvant, in the final formulation **unless** the total level of said compounds is **not more than** 0.05 micrograms of mercury per dose for vaccines and similar biological products or, *for other pharmaceutical products administered more frequently*, **not more than** 0.01 micrograms of mercury per day, on the grounds that so doing will significantly reduce the risks of adverse reactions in susceptible children under the authority conferred upon you by the National Childhood Vaccine Injury Act of 1986, **42 U.S.C. Section 300aa-10 et seq.**, under **42 U.S.C. Section 300aa-27(a)(2)** for vaccines and, *for other drugs*, the general "public safety" authority granted in the Federal Food, Drug, and Cosmetic Act (**21 U.S.C. Chapter 9**),

3. Issue a Class I or, *failing that*, a Class II recall of all batches of multi-dose vaccines that contain a Thimerosal level of more than 0.001 % on the grounds that:
  - a. All such multi-dose vaccine formulations are **now** a proven health hazard to susceptible individuals of all ages **and**
  - b. Therefore, a recall will reduce the risk of adverse reactions that, *under the authority conferred upon you by the National Childhood Vaccine Injury Act of 1986*, you are directed to minimize, **and**
4. *To protect public health and safety*, issue orders:
  - a. Banning vaccines and other infrequently administered biological drug products providing **more than** 0.05 microgram ( $\mu\text{g}$ ) of mercury per dose of product from being introduced into commerce in the United States and any of its territories, possessions, and commonwealths after **1 January 2008**,
  - b. Banning other drug products providing **more than** 0.01  $\mu\text{g}$  of mercury per day from being introduced into commerce in the United States and any of its territories, possessions, and commonwealths after **1 June 2009**, **and**
  - c. Requiring, **after 1 January 2008**, the recall and destruction of ALL:
    - i. Vaccines remaining in commerce that contain **more than** 0.05  $\mu\text{g}$  of mercury per dose, **and**
    - ii. Other drug products remaining in commerce that contain **more than** 0.1  $\mu\text{g}$  of mercury per mL (or g) of drug,

**unless** the manufacturer thereof can prove that the mercury-based compound in said vaccine or other drug product causes **no** adverse neurological health outcomes in any group or subgroup of **susceptible** individuals, including, but not limited to, males, fetuses, newborns, children, and adolescents.

Respectfully,

---

## **SUPPORTING ORGANIZATIONS**

In addition, the organizations listed below declare their strong support for this citizen petition:

Advocates for Children's Health Affected by Mercury Poisoning (A-CHAMP)

Alan D. Clark, MD; Memorial Research Fund

Autism One

Generation Rescue

Healing Every Autistic Life (HEAL)

Moms Against Mercury (MAM)

Mothering Magazine

National Autism Association (NAA)

NoMercury

Sensible Action For Ending Mercury-Induced Neurological Disorders (SafeMinds)

Schafer Autism Report (SAR)

Talk About Curing Autism (TACA)

# OUTLINE OF CITIZEN PETITION

## OVERALL CITIZEN PETITION TEXT

[1 – 25; P-1 – P-447]

- Initial Statement [1 – 2]
- Signatures [2 – 7]
- Supporting Organizations [8]
- Outline pages [9 – 11]
- Listing of all references [12 – 25]

## CITIZEN PETITION

[P-1]

### I. ACTIONS REQUESTED

[P-1 – P-7]

### II. PETITIONERS

[P-7 – P-8]

### III. STATEMENT OF GROUNDS

[P-9 – P-446]

#### A. Introduction

[P-9]

#### B. Safety Not Proven

[P-9 – P-439]

1. Introduction [P-10 – P-11]
2. General Background – Thimerosal [P-11 – P-12]
3. Petitioners’ General Concerns [P-12 – P-15]
4. Thimerosal Usage, Claimed Nontoxicity and Observed Toxicity — 1928 through the 1940s [P-15 – P-25]
5. Thimerosal Usage, Claimed Nontoxicity and Observed Toxicity — 1940s through 1960s [P-26 – P-27]
6. Removal Of Thimerosal And Other Mercury-based Compounds From OTC Drugs [P-27 – P-28]
7. FDA’s Published Call-For-Data Notices And Announcements [P-28]
8. Thimerosal / Ethylmercury Toxicological Effects [P-29 – P-44]
9. Thimerosal & Other Mercurials At Multi-Dose Vaccine Or Lower Levels [P-44 – P-53]
10. Overview of Research Evaluating Thimerosal, Ethylmercury, Phenylmercuric Acetate, & Mercury in General with Respect to Toxicity/Toxicokinetics [P-54 – P-61]
11. Toxicokinetic Observations of Thimerosal-Containing Vaccine Use in Humans & Animal Models [P-61 – P-66]
12. Recent Comments of Federal Officials on Mercurials in Medicine [P-67 – P-71]
13. “Confounded” and “Biased” Epidemiological Studies On Vaccinated Children? [P-71 – P-79]
  - a. Study Using HMOs’ Medical Records For American Children: The “Verstraeten” Studies [P-71 – P-76]
  - b. A Congressman’s Published Views on the CDC Study [P-76 – P-77]
  - c. Epidemiological Studies from Other Developed Countries [P-77 – P-79]

14.	<b><u>Studies Establishing Linkages Between Thimerosal Exposure And Adverse Outcomes, Including “Neurodevelopmental Disorders” (“NDDs”) in US Children</u></b>	[P-79 – P-82]
